# **EXACT data pack 01**

# Contents and supporting information

**Scheme:** UCAS Undergraduate Scheme

**Cycle point:** End of Cycle

Most recent closed cycle: 2020

This data pack contains 364 csv data files covering the UCAS Undergraduate Scheme as at End of Cycle. Outputs 1-91, 92-182, 183-273, and 274-364 are at sector, provider tariff band, provider region, and named provider level respectively. Each of these outputs then show further breakdowns by many of the variables available in the EXACT data service. A full table of contents is provided below.

This makes it possible to compare and contrast offer rates across various aggregations, based on the specific reports listed above. For example, you could compare the offer rate of a chosen provider to the average offer rate of high tariff providers, providers in the North East, and the national average, specifically for courses in the detailed subject group H Engineering.

It is important to be aware that, as described in the technical notes and definitions in this document, an application is defined as a choice to a course in higher education through the UCAS undergraduate main scheme. Also, the number of offers and number of rejects are captured at June 30 deadline, both for the purpose of consistent reporting, and because this is the best snapshot in the cycle from which a comprehensive view of offers and rejects can be obtained.

The outputs included are supplied for various application cycles (see specification list for more details), and this differs for each output, due to the availability of each variable in the EXACT service. For example, to allow a consistent time series, outputs which contain a breakdown of predicted A level points are available from 2010 onwards, as this was the point at which A\* grades were first introduced.

A detailed description of each variable and statistic is provided following the contents table. One of the most important points to note is the disclosure controls applied – cell counts are rounded to the nearest and therefore counts of 1 and 2 are reported as 0.

Please note that these CSV outputs are intended to be read into analytical software. Please be aware that if using Excel, which is restricted to around 1 million records in later versions, or alternative software to access the data, which may have a similar threshold, that all of the records may not be displayed for larger outputs. The EXACT team are happy to assist in splitting these files into multiple, smaller files if Excel is the only available option.

| Output name                                                                 | Statistics                                                                                                                                                                                                                                | Variables                                                                                                                                                                                                                                                                                                                                                   | Filters applied                                                                                                                                           | Year type  | Start year | End year |

# **Basic statistics**

# **Number of Applicants**

Applicant is defined as a person who has made a valid application in the UCAS system. RPAs are included in the total. An RPA (record of prior acceptance) is an application submitted to UCAS by an institution when an unconditional firm has already been offered and accepted by the applicant.

#### **Number of Applications**

Application is defined as a choice to a course in higher education through the UCAS main scheme. Each applicant can make up to five choices, which was reduced from six in 2008. The number of applications does not include choices made through the following acceptance routes: Clearing, Extra, Adjustment and RPAs.

# Number of Conditional Offers as-at 30 June

Offer is defined as a provider's decision to grant a place to an applicant via an application made through the UCAS main scheme (i.e. does not cover choices made through the following routes: Clearing, Extra, Adjustment and RPAs). Offers are captured at June 30 deadline for the purpose of consistent reporting. A conditional offer means that, to be accepted onto the course, the applicant will need to meet the conditions - usually related to their exam results.

#### Number of Offers as-at 30 June

Offer is defined as a provider's decision to grant a place to an applicant via an application made through the UCAS main scheme (i.e. does not cover choices made through the following routes: Clearing, Extra, Adjustment and RPAs). Offers are captured at June 30 deadline for the purpose of consistent reporting.

#### Number of Rejects as-at 30 June

Reject is defined as a provider decision to reject an application from an applicant through the UCAS main scheme (i.e. does not cover choices made through the following routes: Clearing, Extra, Adjustment and RPAs). This includes RBDs (Reject by Default): Where an application has been rejected due to the provider not giving a decision before the required RBD deadline. Rejects are captured at June 30 deadline for the purpose of consistent reporting.

# **Number of Unique Applicants**

The number of applicants making at least one choice through the UCAS main scheme (which excludes Clearing, Extra, Adjustment and RPAs). Each cell gives the number of unique applicants. E.G. If split by subject group an applicant is counted once within each subject group of the course applied to.

#### Number of Unconditional Offers as-at 30 June

Offer is defined as a provider's decision to grant a place to an applicant via an application made through the UCAS main scheme (i.e. does not cover choices made through the following routes: Clearing, Extra, Adjustment and RPAs). Offers are captured at June 30 deadline for the purpose of consistent reporting. An unconditional offer means that the applicant is guaranteed a place on the course even if they do not meet the usual conditions - usually related to their exam results.

#### **Number of Withdrawals**

Withdrawals are defined as an applicant's choice which has been withdrawn, either by themselves of the university or college, before the decision has been made as to whether to make them an offer.

# **Variables**

#### A level qualification indicator

Indicates if an applicant has achieved an A level or A level Double Award qualification (at least one) as identified either on application or through awarding body linkage process. Please note: This flag is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applied in the 2008 cycle without achieving an A level, but went on to obtain this qualification in 2009, the value for the applicant applying in 2008 would remain 'A level qualification not identified'.)

#### Achieved A level point score

A points score attached to the highest 3 A level grades achieved by the applicant as identified either on application or through awarding body linkage process. ABL grades are verified through the awarding bodies for qualifications achieved during the application cycle. Application, i.e. self-declared, grades are considered for any qualifications achieved prior to the academic year in which the application was made, these are then topped-up with ABL grades if there are less than 3 grades declared. The application and ABL grade profiles are then converted to points and compared. The grade profile corresponding to highest overall points score is then used. The following points per grade are used in the calculation: A\* = 6, A = 5, B = 4, C = 3, D = 2, E = 1. A level Double Award grades are included, AS Level grades are not included. The score represents the qualifications recorded as held by the applicant at the end of the cycle to which the statistic relates. This variable is currently only available for 18 year-old applicants domiciled in England, Northern Ireland and Wales, any applicants outside of this cohort will be assigned the value 'Not applicable'. These scores are calculated purely for analytical purposes and do not relate to the UCAS tariff.

#### Achieved BTEC grade

The highest BTEC grade achieved by the applicant as identified either on the application, excluding grades declared as achieved within the application cycle to which this statistic relates, or through awarding body linkage process. This applies to the following qualifications in the NQF framework: NQF National Awards, NQF National Diploma and NQF Subsidiary Certificates, and the following qualifications in the QCF framework: QCF Subsidiary Diplomas, QCF Diploma, QCF Extended Diploma and QCF 90 Credit Diplomas. This grade represents the qualifications recorded as held by the applicant at the end of the cycle to which the statistic relates. This variable is currently only available for applicants who are domiciled in England, Northern Ireland and Wales, any applicants outside of this cohort will be assigned the value 'Not applicable'. Any applicant who is within this cohort, but who has not achieved a BTEC, will be assigned the value of 'No BTEC held'.

#### Achieved International Baccalaureate points band

A grouping of the applicant's achieved International Baccalaureate 'IB' Diploma points score as identified either on application or through awarding body linkage process. This takes into account all of the Diploma Programme curriculum i.e. the DP core and the six subject groups. If identified through awarding body linkage then the applicant needs to have achieved 24-45 points in order to qualify. Please note: The underlying points score is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applied in the 2008 cycle without achieving 24 points or more, but went on to obtain this qualification in 2009, the value for the applicant applying in 2008 would remain 'No IB diploma held'.)

Achieved SQA points score (Advanced Highers)

A points score attached to the highest 3 SQA Advanced Higher grades achieved by the applicant as identified either on application or through awarding body linkage process. ABL grades are verified through the awarding bodies for qualifications achieved during the application cycle. Application, i.e. self-declared, grades are considered for any qualifications achieved prior to the academic year in which the application was made, these are then topped-up with ABL grades if there are less than 3 grades declared. The application and ABL grade profiles are then converted to points and compared. The grade profile corresponding to highest overall points score is then used. The following points per grade are used in the calculation: A = 4, B = 3, C = 2, D = 1. Please note: This value is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applied in the 2010 cycle with one SQA Advanced Higher grade 'C', but went on to obtain a further two SQA Advanced Highers in 2011, the value for the applicant applying in 2010 would remain 2.) This is only relevant for applicants who are domiciled in Scotland, any applicants outside of this cohort will be assigned the value 'Not applicable'. This points score is not equivalent to the Achieved SQA points score (Highers) variable, any other analytical points score variables, or the UCAS tariff points.

#### Achieved SQA grade profile (Advanced Highers)

The highest 3 SQA Advanced Higher grades achieved by the applicant as identified either on application or through awarding body linkage process (ABL). ABL grades are verified through the awarding bodies for qualifications achieved during the application cycle. Application, i.e. self-declared, grades are considered for any qualifications achieved prior to the academic year in which the application was made, these are then topped-up with ABL grades if there are less than 3 grades declared. The application and ABL grade profiles are then converted to points and compared. The grade profile corresponding to highest overall points score is then used. Please note: This value is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applied in the 2010 cycle with one SQA Advanced Higher grade 'C', but went on to obtain a further two SQA Advanced Highers in 2011, the value for the applicant applying in 2010 would remain 'C'). This is only relevant for applicants who are domiciled in Scotland, any applicants outside of this cohort will be assigned the value 'Not applicable'.

#### Achieved SQA points score (Highers)

A points score attached to the highest 3 SQA Higher grades achieved by the applicant as identified either on application or through awarding body linkage process. ABL grades are verified through the awarding bodies for qualifications achieved during the application cycle. Application, i.e. self-declared, grades are considered for any qualifications achieved prior to the academic year in which the application was made, these are then topped-up with ABL grades if there are less than 3 grades declared. The application and ABL grade profiles are then converted to points and compared. The grade profile corresponding to highest overall points score is then used. The following points per grade are used in the calculation: A = 4, B = 3, C = 2, D = 1. Please note: This value is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applying in 2010 would remain 2.) This is only relevant for applicants who are domiciled in Scotland, any applicants outside of this cohort will be assigned the value 'Not applicable'. This points score is not equivalent to the Achieved SQA points score (Advanced Highers) variable, any other analytical points score variables, or the UCAS tariff points.

#### Achieved SQA grade profile (Highers)

The highest 5 SQA Higher grades achieved by the applicant as identified either on application or through awarding body linkage process. ABL grades are verified through the awarding bodies for qualifications achieved during the application cycle. Application, i.e. self-declared, grades are considered for any qualifications achieved prior to the academic year in which the application was made, these are then topped-up with ABL grades if there are less than 3 grades declared. The application and ABL grade profiles are then converted to points and compared. The grade profile corresponding to highest overall points score is then used. Please note: This value is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applied in the 2010 cycle with one SQA Higher grade 'C', but went on to obtain a further two SQA Highers in 2011, the value for the applicant applying in 2010 would remain 'C'). This is only relevant for applicants who are domiciled in Scotland, any applicants outside of this cohort will be assigned the value 'Not applicable'.

## Age band (5 levels)

Derived from date of birth declared by the applicant, age is aligned with the cut off points for school/college cohorts within the different administrations of the UK. For England and Wales ages are defined on the 31 August, for Northern Ireland on the 1 July and for Scotland on the 28 February the following year. Defining ages in this way matches the assignment of children to school cohorts. For applicants outside of the UK the cohort cut off for England and Wales has been used. Age then is grouped in the following bands: '17 and under', '18', '19', '20', '21 and Over'. Please note: if the derived age is outside of the range 11-100 then it is set to 18 by default.

#### Applicant domicile (low level - domestic focus)

Applicant's area of permanent residence, which broadly relates to UK town, city, county or London borough. The domicile is declared by the applicant by selecting from a list of available domiciles during the application process. In the interest of keeping a consistent time series, the most recent label for each domicile is displayed across the time series, regardless of the label displayed to the applicant at the time of the application. For example, in the 2005 application cycle the label 'Barking' changed to 'Barking and Dagenham', however the report will display 'Barking and Dagenham' across every application cycle going back to 2004. Also, changes in the application process, such as a reordering of the list of available domiciles displayed to the applicant, may result in fluctuations of volumes for a particular value. Please note: The Channel Islands and the Isle of Man are assigned as 'Not UK'.

# Applicant domicile (medium level - UK and global regions)

Applicant's area of permanent residence summarised to UK and global regions. This variable is derived from domicile as declared by the applicant. Split by the following values if domiciled in the UK: 'North East', 'Yorkshire and The Humber', 'North West', 'East Midlands', 'East Midlands', 'East of England', 'London', 'South East', 'South West', 'Wales', 'Northern Ireland', 'Scotland'. Split by the following regions if Non UK: 'Africa', 'Americas', 'Australasia', 'Europe', 'Asia'. Please note: The Channel Islands and the Isle of Man are assigned as 'Europe'.

# BTEC qualification indicator

Indicates if an applicant has achieved a BTEC qualification (at least one) as identified either on application or through awarding body linkage process. This applies to the following qualifications in the NQF framework: NQF National Awards, NQF National Certificate, NQF National Diploma and NQF Subsidiary Certificates, and the following qualifications in the QCF framework: QCF Subsidiary Diplomas, QCF Diploma, QCF Extended Diploma and QCF 90 Credit Diplomas. Please note: This flag is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applied in the 2008 cycle without achieving a BTEC, but went on to obtain this qualification in 2009, the value for the applicant applying in 2008 would remain 'BTEC qualification not identified'.)

# Applicant domicile (low level - overseas country focus)

Applicant's area of permanent residence, which broadly relates to country. The domicile is declared by the applicant by selecting from a list of available domiciles during the application process. In the interest of keeping a consistent time-series, the most recent label for each domicile is displayed across the time series, regardless of the domicile displayed to the application. For example, in the 2009 application cycle the label 'Virgin Islands' (British)' changed to 'British Virgin Islands' across every application cycle going back to 2004. Please note: The Channel Islands and the Isle of Man are displayed as separate values, rather than being part of 'United Kingdom'.

# Difference in achieved and predicted A level points score

The difference between the score attached to the predicted A level points score declared by the applicant on the application and the points score attached to the A level grades achieved by the applicant as identified either on application or through awarding body linkage process. ABL grades are verified through the awarding bodies for qualifications achieved during the application, i.e. self-declared, grades are considered for any qualifications achieved prior to the academic year in which the application was made, these are then topped-up with ABL grades if there are less than 3 grades declared. The application and ABL grade profiles are then converted to points and compared. The grade profile corresponding to highest overall points score is then used. The highest 3 grades are considered only, adding up the following points per grade: A\* = 6, A = 5, B = 4, C = 3, D = 2, E = 1. Due to relatively small frequencies of more extreme values, differences of 5 points or more, positive or negative,

have been given the value of plus or minus '5 or more points'. These scores are calculated purely for analytical purposes and do not relate to the UCAS tariff. Zero points refers to those who were predicted the same number of points as they achieved. This points difference variable only makes sense when comparing the same number of A level grades. Therefore, any applicant with fewer than 3 predicted or achieved A level grades will come under the value 'Fewer than 3 predicted or achieved A level grades'. This variable is only relevant for 18-year-old applicants domiciled in England, Northern Ireland and Wales, any applicants outside of this cohort will be assigned the value 'Not applicable'.

#### **Extended Project qualification indicator**

Indicates if an applicant holds an Extended Project Qualification (EPQ) as identified either on application or through awarding body linkage process. The qualification was introduced in 2008 and has pass grades A\*-E which award 28, 24, 20, 16, 12, and 8 tariff points respectively. Please note: this variable includes the City & Guilds Level 3 Extended Project.

#### **HECoS CAH1** subject group

HECOS (Higher Education Classification of Subjects) is a classification system for subjects, for which the primary use is in categorising the subject contents of a course. It is a new coding system created to replace JACS3.0. Each course code is assigned to up to five new HECoS codes. A Common Aggregation Hierarchy (CAH) has been developed to provide standard groupings that can be applied to both HECoS and JACS subjects allowing for consistent analysis across both coding frameworks. There are three subject levels (CAH1, 2, & 3). CAH1 is the highest-level subject grouping of the hierarchy with 23 values.

#### **HECoS CAH3** subject group

HECOS (Higher Education Classification of Subjects) is a classification system for subjects, for which the primary use is in categorising the subject contents of a course. It is a new coding system created to replace JACS3.0. Each course code is assigned to up to five new HECOS codes. A Common Aggregation Hierarchy (CAH) has been developed to provide standard groupings that can be applied to both HECOS and JACS subjects allowing for consistent analysis across both coding frameworks. There are three subject levels (CAH1, 2, & 3). CAH3 is the lowest-level subject grouping of the hierarchy with 166 values.

# **HECoS CAH2** subject group

HECoS (Higher Education Classification of Subjects) is a classification system for subjects, for which the primary use is in categorising the subject contents of a course. It is a new coding system created to replace JACS3.0. Each course code is assigned to up to five new HECoS codes. A Common Aggregation Hierarchy (CAH) has been developed to provide standard groupings that can be applied to both HECoS and JACS subjects allowing for consistent analysis across both coding frameworks. There are three subject levels (CAH1, 2, & 3). CAH2 is the middle-level subject grouping of the hierarchy with 35 values.

# Live at home indicator

Live at Home Flag - Indicates whether applicant intends to live at home during course.

#### International Baccalaureate qualification indicator

Indicates if an applicant holds an International Baccalaureate 'IB' qualification (at least one) as identified either on application or through awarding body linkage process. If identified through awarding body linkage then the applicant needs to have achieved 24-45 points in order to qualify. Please note: This flag is not updated beyond the end of the applicant occurrence of the applicant applied in the 2008 cycle without achieving an IB, but went on to obtain this qualification in 2009, the value for the applicant applying in 2008 would remain 'IB qualification not identified'.)

#### Provider name 2020

A mapped view of the Higher Education Provider (HEP) as-at 2020. In the interest of keeping a consistent time series the HEP displayed is mapped from a previous HEP if a merger has occurred or the HEP has been renamed. E.g. In 2013 HEPs K05 and H50 merged, so all instances of H50 prior to 2013 will be reported as K05.

#### Provider region 2020

A mapped view of the UK region in which the provider is situated as-at 2020. Split by the following values: 'North East', 'Yorkshire and The Humber', 'North West', 'East Midlands', 'East of England', 'London', 'South East', 'South West', 'Wales', 'Northern Ireland', 'Scotland'. In the interest of keeping a consistent time series the provider is mapped from a previous provider if a merger has occurred. E.g. In 2013 providers K05 and H50 merged, so the provider region of H50 will be reported as the provider region of K05.

#### Predicted A level points score

A score attached to the predicted A level grade profile declared by the applicant on the application. The highest 3 grades are considered only, adding up the following points per grade: A\* = 6, A = 5, B = 4, C = 3, D = 2, E = 1. AS Levels are not included. This variable is currently only available for 18 year-old applicants domiciled in England, Northern Ireland and Wales, any applicants outside of this cohort will be assigned the value 'Not applicable'. These scores are calculated purely for analytical purposes and do not relate to the UCAS tariff.

#### Predicted BTEC grade

The highest BTEC grade predicted for the applicant as identified on the application, excluding grades declared as achieved within the application cycle to which this statistic relates. This applies to the following qualifications in the NQF framework: NQF National Certificate, NQF National Diploma and NQF Subsidiary Certificates, and the following qualifications in the QCF framework: QCF Subsidiary Diplomas, QCF Diploma, QCF Extended Diploma and QCF 90 Credit Diplomas. This grade represents the qualifications recorded as held by the applicant at the end of the cycle to which the statistic relates. This variable is currently only available for applicants who are domiciled in England, Northern Ireland and Wales, any applicants outside of this cohort will be assigned the value of 'No BTEC held'.

# Predicted International Baccalaureate points band

A grouping of the applicant's predicted International Baccalaureate 'IB' Diploma points score as identified on the application. This takes into account all of the Diploma Programme curriculum i.e. the DP core and the six subject groups. If identified through awarding body linkage then the applicant needs to have achieved 24-45 points in order to qualify. Please note: The underlying points score is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applied in the 2008 cycle without achieving 24 points or more, but went on to obtain this qualification in 2009, the value for the applicant applying in 2008 would remain 'No IB diploma held'.)

# Predicted SQA points score (Advanced Highers)

A points score attached to the highest 3 SQA Advanced Higher grades predicted for the applicant as identified on application. The grade profile corresponding to highest overall points score is then used. The following points per grade are used in the calculation: A = 4, B = 3, C = 2, D = 1. Please note: This value is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applied in the 2010 cycle with one SQA Advanced Higher grade 'C', but went on to obtain a further two SQA Advanced Highers in 2011, the value for the applicant applying in 2010 would remain 2.) This is only relevant for applicants who are domiciled in Scotland, any applicants outside of this cohort will be assigned the value 'Not applicable'. This points score is not equivalent to the Predicted SQA points score (Highers) variable, any other analytical points score variables, or the UCAS tariff points.

#### Predicted SQA grade profile (Advanced Highers)

The highest 3 SQA Advanced Higher grades predicted for the applicant as identified on application. The grade profile corresponding to highest overall points score is then used. Please note: This value is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applicants outside of this cohort will be assigned the value 'Not applicable'.

#### Predicted SQA points score (Highers)

A points score attached to the highest 3 SQA Higher grades predicted for the applicant as identified on application. The grade profile corresponding to highest overall points score is then used. The following points per grade are used in the calculation: A = 4, B = 3, C = 2, D = 1. Please note: This value is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applied in the 2010 cycle with one SQA Higher grade 'C', but went on to obtain a further two SQA Highers in 2011, the value for the applicant applying in 2010 would remain 2.) This is only relevant for applicants who are domiciled in Scotland, any applicants outside of this cohort will be assigned the value 'Not applicable'. This points score is not equivalent to the Predicted SQA points score (Advanced Highers) variable, any other analytical points score variables, or the UCAS tariff points.

#### Predicted SQA grade profile (Highers)

The highest 5 SQA Higher grades predicted for the applicant as identified on application. The grade profile corresponding to highest overall points score is then used. Please note: This value is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applied in the 2010 cycle with one SQA Higher grade 'C', but went on to obtain a further two SQA Highers in 2011, the value for the applicant applying in 2010 would remain 'C'). This is only relevant for applicants who are domiciled in Scotland, any applicants outside of this cohort will be assigned the value 'Not applicable'.

# Advanced Welsh Baccalaureate Skills Challenge Certificate qualification indicator

Indicates if an applicant holds an Advanced Welsh Baccalaureate Skills Challenge Certificate 'SCC' qualification as identified either on application or through awarding body linkage process. The SCC first began teaching in September 2015 and was incorporated into the fully reformed Advanced Welsh Baccalaureate which was awarded from 2017 onwards. Achievement of the Advanced Welsh Baccalaureate depends upon achievement in the SCC and other qualifications (see definition of Advanced Welsh Baccalaureate). The SCC has passing grades A\*-E. Holding a SCC qualification is therefore derived from the grades listed above.

#### SQA qualification indicator

Indicates if an applicant has achieved an SQA higher or advanced higher qualification (at least one) as identified either on application or through awarding body linkage process. Please note: This flag is not updated beyond the end of the application cycle for each applicant. (I.e. if an applicant applied in the 2008 cycle without achieving an SQA, but went on to obtain this qualification in 2009, the value for the applicant applying in 2008 would remain 'SQA qualification not identified'.)

#### Subject group (summary level)

Classifies courses into a summary level of 26 subjects. Each course is assigned up to three valid JACS3 subject codes (e.g. G100 – Mathematics) and a course balance indicator by UCAS, which are available for review by the provider. The course is assigned a subject based on these JACS3 subject codes and balance indicator, it largely correlates to the first two characters of the subject codes. Where there are more than one JACS3 subject codes for a given course, and the balance indicator is dual or triple, the first two characters of each subject code are reported in combination to a relevant category (e.g. Course with dual balance indicator with JACS3 subject codes B940 = Counselling and C843= Counselling psychology is assigned a subject 'Y Combined sciences'). Please note: Between 2007 and 2011 the subject codes assigned to each course were from the JACS2.0 classification, therefore JACS3 versions of the subject categories have been approximated for 2007 to 2011 to allow a consistent time series.

# Subject group (detailed level)

Classifies courses into a detailed level of 215 subjects. Each course is assigned up to three valid JACS3 subject codes (e.g. G100 – Mathematics) and a course balance indicator by UCAS, which are available for review by the provider. The course is assigned a subject based on these JACS3 subject codes and balance indicator, it largely correlates to the first two characters of the subject codes. Where there are more than one JACS3 subject codes for a given course, and the balance indicator is dual or triple, the first two characters of each subject code are reported in combination to a relevant category (e.g. Course with dual balance indicator with JACS3 subject codes L370 = Social Theory and M900 = Others in Law is assigned a subject 'Y Combs of soc studies/law').

Please note: Between 2007 and 2011 the subject codes assigned to each course were from the JACS2.0 classification, therefore JACS3 versions of the subject categories have been approximated for 2007 to 2011 to allow a consistent time series.

# Provider tariff band

The grouping of providers based on the average levels of attainment of their accepted applicants (summarised through UCAS Tariff points) in a period of application cycles spanning from 2004 to 2011. Each group of providers accounted for around a third of all UK 18 year old acceptances in these cycles. Split by the following values: 'Higher', 'Medium', 'Lower'.

#### Advanced Welsh Baccalaureate qualification indicator

Indicates if an applicant holds an Advanced Welsh Baccalaureate 'WB' qualification as identified either on application or through awarding body linkage process. The WB has been in a reformation process since 2014, with an interim version of the qualification being awarded in 2015 and 2016, and the fully reformed WB being awarded in 2017. Until 2016, achievement of the WB qualification required completing the Core of the Welsh Baccalaureate Qualification as well as additional qualifications. For 2014, the core was graded as either 'Pass' or 'Fail' with all passes allocated the same tariff points. For 2015-2016, the core qualification had pass grades A\*-C with 56, 48, 40, and 32 tariff points respectively. The fully reformed 2017 WB will incorporate the Advanced Skills Challenge Certificate (which first began teaching in September 2015), as well as required level 3 and GCSE qualifications, and has pass grades A\*-E. Holding a WB qualification is therefore derived from the grades listed above for the respective cycles.

#### Disclosure controls

Disclosure controls have been applied to the data to reduce the risk of disclosing personal data about identifiable individuals.

For counts, the controls include reporting each cell count to the nearest five. In particular cell counts of 1 and 2 are reported as 0. Rows that only report 0 are omitted from the output. These controls are applied to each cell independently so this may result in instances where totals do not equal the sum of the components.

For derived statistics (e.g. means), to ensure these disclosure controls are not undone, a minor adjustment is applied, if necessary, such that the set of records contributing to each cell matches the reported cell count (to the nearest five). This involves either removing 1 or 2 records at random, or adding in 1 or 2 duplicates at random. If the number of values contributing to a cell is 1, 2 or 0 then it is displayed as 'N'. Rows that only report 'N' are omitted from the output.
