Definitions

SIMD Quintile 2012

Scottish index of multiple deprivation (SIMD) for 2012 identifies small area concentrations of multiple deprivation across all of Scotland, providing a relative measure of deprivation amongst 6505 small areas (data zones) based on 7 socio-economic domains. These small areas are classified into five groups ranked from Quintile 1 (considered the most deprived) to Quintile 5 (considered least deprived), with equal populations in each quintile. Quintiles are assigned using the postcode declared by the applicant, applicants declaring invalid postcodes are classified as 'Not assigned'. In Scotland, there is a substantial section of provision that is not included in UCAS' figures. This is mostly full-time higher education provided in further education colleges, which represents around one third of young, full-time undergraduate study in Scotland, and this proportion varies by geography and background within Scotland. Accordingly, the statistics in this data resource reflect only that majority of full-time undergraduate study that uses UCAS.

Cycle Year

The cycle in which the application was processed.

Number of Acceptances

Acceptance is defined as an applicant who has been placed for entry into higher education.
