### SIMD Quintile 2016

Scottish index of multiple deprivation (SIMD) for 2016 identifies small area concentrations of multiple deprivation across all of Scotland, providing a relative measure of deprivation amongst 6505 small areas (data zones) based on 7 socio-economic domains. These small areas are classified into five groups ranked from Quintile 1 (considered the most deprived) to Quintile 5 (considered least deprived), with equal populations in each quintile. Quintiles are assigned using the postcode declared by the applicant, applicants declaring invalid postcodes are classified as 'Not assigned'. Please note: SIMD is only relevant for applicants domiciled in Scotland, therefore any applicants outside of this cohort are classified as 'Not applicable'.
